

Senior Analyst

Sustainable Water, Agriculture and Renewable Energy

RRG Capital Management (RRG) is an impact investment/management firm that acquires, develops and manages assets in the sustainable water, agricultural, and renewable energy sectors. RRG is seeking a senior analyst to work with investment and operating teams based in Los Angeles.

Position Summary

Our analysts are an integral part of RRG's deal acquisition, development, and management teams. Analysts work collaboratively with others to conduct financial, operational, and strategic analyses across a diverse portfolio of impact investments and assets. Responsibilities include communicating with and reporting to investors and the identification of opportunities to maximize returns and profits while participating in complex decision-making related to asset identification, acquisition, management, and disposition. The successful candidate will be energetic and entrepreneurial, with a passion to learn and work collaboratively with a dynamic, interdisciplinary team.

Key Areas of Responsibility

- Generating detailed financial models to analyze existing and potential investments
- Supporting asset managers in measuring and managing investment performance
- Working with and improving upon existing operational models
- Budgeting and forecasting
- Summarizing and presenting results to management, Investment Committee and investors
- Developing and analyzing innovative ways to identify, value and monetize sustainability measures
- Conducting industry research and market analysis corresponding to potential and current investments, and supporting development of new investment theses

What We Are Looking For

- Bachelor's or master's degree in engineering, accounting, finance, economics, or business administration
- At least 2-3 years of relevant work experience, preferably in investment banking and/or M&A
- Basic to intermediate accounting skills, with proficiency in analyzing financial statements
- Ability to work independently with high attention to detail and produce accurate deliverables
- Problem Solver - capacity to apply knowledge and skills to solve and manage complex problems
- Team Player - ability to build and manage relationships effectively within teams and with clients
- Self-starter - takes initiative and ownership of projects and drives progress with limited direction in a non-hierarchical entrepreneurial organization where teamwork, humility, and a learning mindset are critical to success
- Additional statistical, simulation, and optimization software knowledge is a plus
- Agricultural, renewable energy and/or water experience is a plus
- Spanish language skills are a plus

What We Offer

The successful applicant will assume immediate responsibility for challenging work in a close-knit, supportive office community. We offer competitive salaries and excellent benefits, along with the opportunity to join a team of passionate individuals who share a unique entrepreneurial culture in a casual, open office environment located in the heart of Los Angeles' District La Brea.

About the Company

RRG is a growing firm with over 16 years of experience investing in sustainable water, agriculture, and renewable energy assets. We have active projects in California, Arizona, Australia, Mexico, and Chile.

RRG's experience includes:

- Developing approximately 2 million acre-feet of water projects
- Managing over 100,000 acres of agricultural land
- Operating diverse, vertically integrated agricultural companies in the grape, almond, and date sectors
- Developing over 2,000 MW of renewable energy
- Valuing and monetizing environmental attributes such as habitat, in stream flows, groundwater restoration and carbon
- Innovating to establish market leading sustainability metrics and outcomes

To apply, please send a cover letter and resume to lrankin@renewablegroup.com.

RRG is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.
