

Regan Smith Bio

Regan is a Managing Director Sustainable Investing, within Manulife Investment Management's private markets. She has overall accountability for implementing and managing the sustainability strategy within our real estate and infrastructure portfolios. She works alongside global investment management teams and asset managers to assess the environmental and social impact of investments. Regan is a member of Manulife's Climate Change Taskforce and works collaboratively to advance Manulife's Climate Action Plan and support achievement of GHG reduction targets throughout the enterprise. Prior to joining Manulife, Regan held a leadership role at the engineering consulting firm WSP. In this role, she led sustainability advisory services providing consulting for green building certification, energy and carbon management, and greenhouse gas accounting. Regan is a member of the Principle for Responsible Investment (PRI) Real Estate Advisory Committee. Regan was recognized as a 2022 Clean50 recipient and completed the Competent Boards Climate certificate program in 2021.
